Around on the lawn and in the paddock
stood groups of trainers and stable boys
all discussing the chances of their respective favorites.
Lamplighter was the general favorite.
They could not conceive how he could
be beaten, especially if he was in anything like fit condition. There were
rumors, however, that the son of Spendthrift did not work as well as was expected on Saturday and Sunday.
It seems that the great four-year-old
has developed a very bad temper, and
he either could not or would not do his
work in anything like decent shape.
He sulked very plainly, and was beaten
by Klideer. The latter was beaten both
by Count and Glooming in a race vester-

It is more than probable, however, that the accounts have been exaggerated, and that the great colt was simply loafing, an act which he can do to perfection.

perfection.

Lamplighter will show very different form in his races.

Banquet was generally believed to be the horse that would beat Lamplighter if any one did. His races this Spring have been first-class, and he has always hunted Lamplighter very close.

Matters were a trifle more exciting on the outside of the track. It was whispered about that Johnny McKane had paid a visit to the two hotel-keepers opposite the track and had ordered them to remove all wires from their premises.

## GOOD REPORTS FROM HAMBURG.

Dr. Nash Cables Reassuringly to Health Officer Jenkine.

Health Officer Jenkins said to-day that the reports from Hamburg, through his representative, Dr. Nash, have been entirely satisfactory and reassuring as to the change of water supply in that city, and the excellent sanitary work of Dr. Nash on steamers sailing for this port since January last.

It is on the basis of such work at the port of departure that the Heaith Officer endeavors to reassure the public of the favorable outlook for this Sumer.

In response to a cable inquiry, based on the reports concerning the water supply of Hamburg, Dr. Nash replies that the reports of a scarcity of filtered water are decidedly false. The entire city, he says, is amply supplied with pure filtered water. All the streets are now sprinkled with the same, and the unfiltered water supply has been cut off. There is a superabundance of water furnished to the filter plant, which supplies all the needs of the city. The Hamburg American Packet Company is using only artesian water from a pure and independent source. No case of cholera has been reported in the city or suburbs since March 4. Dr. Nash says, excepting the sporadic case, still doubted by many, of May 29.

### CHEAPER WORLD'S FAIR RATE.

The Subject Under Discussion by

the Trunk Line Association. The question whether it is advisable to reduce the present railroad rate to the World's Fair came up to-day at the regular meeting of the passenger agents of the Trunk Line Association. The meeting was begun shortly after

11 o'clock in the rooms of the Trunk Line Commision at 143 Liberty street. Those present at the meeting. Dr. Wyncoop this morning found that his patient had passed a restless night and was in consequence weaker to Wood, o fthe Pennsylvania; Holwel, of Delaware, Lackawanna and Western; Roberts, of the Erie; Hancock, Reading; Lambert, West Shore; Anderson, Ontario and Western; Baldwin, Jersey Central; Scuil, Baltimore and Ohlo, and Assistant General Passenger Agent Richards, of the New York Central.

Just before the meeting one of the general passenger agents told an "Evening World" reporter that there was every likelihood that the Committee would recommend the further reduction of the present rates to a one-way rate basis, Many passenger agents were in favor of the reduction, but such a recommendation has to be indorsed by the Executive Committee of the Trunk Line Association.

The present one-way rate to Chicago by the Pennsylvania and New York Central is \$20, while there is a difference of from \$1 to \$3 by the other lines. The only reduction on account of the Fair is on thirty-five-hou trains, and is 20 per cent.

SECOND ACT OF THE TRAGEDY "Bridget was doing her work at the house, and the old man was taking the last walk of his life. Mr. Knowlton emphasized the facthat Lizzie left her froning unfinished when the crime was committed. Reading her varying explanations of her conduct at the time of the crime, he argued that they were incredible. Rubinski's story of the woman coming from the story of the woman coming from the barn was indefinite, and Medley's story refuted the defendant's alibi. The prisoner watched Mr. Knowlton fixedly during his argument.

Mr. Knowlton argued that the stik dress produced by the defendant was not the dress worn at the time of the murder, as shown by Mrs. Churchill. Doherty and Dr. Howen.

The search day of the murder was insufficient, but out the defendant on her guard, and Saturday's thorough search falled to disclose the dress, therefore he claimed that it was convexied.

The production of a hatchet was no part of the government's case, but it was a part of its duty to produce all it knew bearing on the case.

Mr. Knowiton reviewed at length the evidence as to the handleless hatchet, and discussed its bearing on the case, dwelling on the significance of its fitting the wounds and being broken short as if by design.

After discussing again the matter of the missing note the District-Attorney briefly summarized his entire argument, claiming that the defense amounted to nothing, and closing at 12.66 with an eloquent appeal to the jury to decide as their consciences should direct.

The court then took a recess till 1.45.

As the waiters only receive \$25 a month wages, which is less than a dollar a day, they think they have been very unfairly dealt with.

They say that they are obliged to be up at 4.30 in the morning, and that each waiter must wait on sixty men a day, twenty at each meal.

If any money is raised by the members of the visiting regiments they think they are entitled to a good share of it, for they are not allowed to receive "tips" for their regular service, and their wages are so small that they need the money.
